

GREEN CHIMNEYS ON-CAMPUS VISIT GUIDELINES DURING COVID-19

Revised 7.10.20

In order to provide the safest environment possible for the children, families, and staff, please adhere to the following guidelines for visits on our campus:

1. Schedule visit in advance with your child's therapist. We can only accommodate a limited number of families in any given time slot. Visits will be scheduled on a first-come-first-served basis.
2. Visits are limited to a maximum of 4 family members. Should your immediate family be larger than 4, please speak with your child's therapist regarding an exception.
3. No pets allowed, as per our usual policy.
4. Visit is to remain on grounds, please do not ask to take your child off grounds.
5. You will be required to wear a mask on campus at all times, other than when you are actively eating or drinking. We know you will be thrilled to see your child and, your initial greeting aside, we ask that you practice social distancing, both with your child and with any other visitors or staff you may see on the campus.
6. When you arrive to campus, you will pull into a designated parking spot in front of our Health Center and ring the bell at the entrance to the Health Center. Let the staff answering know you are there for a visit screening and the name of your child. The nurse will either come outside to you or ask you to enter the front vestibule. You will not be permitted to enter beyond the vestibule. A health screening, which will include taking your temperature and asking questions about possible exposure, will be conducted by our nursing staff. Once you are cleared to remain on campus, you will be directed to your visit location. Your child will be brought to the location by staff.
7. You will be directed to tented picnic areas for your visit. The tent will provide coverage in the case of inclement weather. Visit will be held rain or shine.
8. You can bring food to share with your family or our Food Services staff can provide you with a boxed meal if you wish. If you would like the boxed meal, please let your child's therapist know how many at the time of visit sign-up. If you prefer to bring food, please only bring enough for the visit. Your child will be unable to take back leftovers to the dorm. If you would like to bring them snacks to bring back to the dorm, you may do so, so long as you adhere to personal snack policy (see attached).
9. There is a portable toilet and hand-washing & sanitizer station near each visit location, which is where you will be directed to go should you need to use the facilities.
10. You will only have limited access to the campus during your visit. List of areas open & closed to visiting is below.
11. All visits will be limited to 2 hours. We ask that you arrive and depart on time in order to leave time for proper cleaning in between visits. Unfortunately, if you arrive late, you will still need to depart at the scheduled time.
12. At the end of the visit time, return your child to Health Center, where a staff member will arrive to bring your child back to the dorm program. You will be asked to depart the campus at this time.
13. Clinical & residential staff will be on campus and available to help during the visits, for the separation at the end of the visit, and to support your child afterward, should they need it.
